

Medical Computer Consulting, Management and Support

BeckITSystems Medical Computer Management frees you to grow your practice without tackling the day-to-day distractions of computer issues. Our computer management support team guarantees its work with the **A.I.M.S. Promise:**

Acquire- We understand your urgent care practice demands special function office computer equipment. Whether you require digital X-ray display, EMR, or records management and data backup, our team supplies your practice with everything you need to open on time.

Install-- Devote time to opening your practice while your medical computer team installs and tests your equipment, and even trains your staff. Your computer team ensures your practice holds its grand opening smoothly and on-time, with no computer problems.

Manage-- Your medical computer team monitors over 250 parts of every computer daily, and solves small issues before problems arise. Your patient encounters are optimized by supporting computer systems that work for you all day, every day.

Support-- You know what it's like being on call, and so do we. Our U.S.-based support desk provides prompt help through the toll-free call center..
